Professional Summary

Senior DevOps & Platform Engineer with 10+ years of experience driving enterprise-scale CI/CD transformations, cloud/on premises infrastructure, and integration platform engineering in mission-critical rail transportation environments.

Deep expertise in Azure DevOps, MuleSoft, Docker, Kubernetes, Infrastructure as Code, Ansible AWX/AAP, Cisco ACI, Boomi, Java, .NET, Snowflake and PowerBI with a strong track record of reducing deployment failures, accelerating release cycles, and standardizing DevOps practices across large cross-functional teams. Actively expanding into NetOps, AI infrastructure deployments.

Technical Skills

Source Control	Git, GitHub, Bitbucket, TFS/Azure Repos, GitLab
DevOps & CI/CD	Azure DevOps, TeamCity, Octopus Deploy, GitHub Actions, TFS (2012-2017), GitOps
Cloud & Infrastructure Automation	AWS, Cisco ACI, Ansible AWX/Tower and AAP
Containers & Orchestration	Docker, Kubernetes, Helm, JFrog Artifactory
Integration Platforms	MuleSoft ESB (v3.x,v4.x), Boomi, RabbitMQ
Scripting, Programming & Build tools	PowerShell, Bash/Shell, YAML, Maven, Gradle, MS Build, Java, .NET
Data & Reporting	Snowflake, SQL Server, SSIS, Power BI, ELK Stack
Monitoring	Dynatrace, Solarwinds, Anypoint Platform monitoring

Certifications

- **Mulesoft Certified Platform Architect** – Level 1 – Issued in June 2023
- **MuleSoft Certified Developer** – Level 1 – Issued in Aug 2022

Professional Experience

Canadian Pacific Kansas City Limited

May 2023 - Present

Senior DevOps Engineer

- Architected and enforced enterprise-wide DevOps standards including branching strategy, versioning, and CI/CD best practices across a unified CPKC post-merger technology organization.
- Led Power BI tenant migration from legacy CP and KCS to unified CPKC environment with full Azure DevOps CI/CD automation. Awarded CPKC Hotshot Award (Control Costs) for a project cost saving \$400K+.
- Automated Cisco ACI fabric management using Ansible playbooks orchestrated through AWX on Kubernetes, managed by the AWX Operator.
- NetOps with expertise in ansible automation, Kubernetes platforms, infrastructure orchestration, Automated management of core ACI constructs, including Tenants, VRFs, Bridge Domains, Application Profiles, EPGs via the APIC REST API and Enhanced GitOps deployment for ansible AWX/Tower security.
- Stabilized enterprise delivery pipelines across Bitbucket, TeamCity, Octopus Deploy, and Azure DevOps by resolving recurring build/release failures, improving reliability for cross-functional development teams.
- Designed and implemented Boomi CI/CD pipelines from scratch, aligning the integration team with enterprise delivery standards.

- Maintained deployment automation scripts across Java, .NET, Power BI and Snowflake workloads, reducing manual effort and increasing release consistency.
- Reduced deployment failure rates by 35% through real-time pipeline monitoring, SLA-based alerting, and systematic root-cause resolution.
- Led knowledge-sharing sessions on CI/CD and automation, empowering application teams to own their delivery pipelines.

Kansas City Southern Railway Company

Feb 2020 - Apr 2023

DevOps Engineer & Mulesoft Platform Architect

- Owned the full TFS-to-Azure DevOps migration lifecycle from planning and architecture to execution, enabling cloud-native delivery.
- Built and deployed the MuleSoft platform stack from scratch (Mule Runtime 4.3), supporting the KCS S4 transformation as a MuleSoft Center4Enablement(C4E) team.
- Delivered & supported 200+ MuleSoft Integrations to production and led the vendor team through V3-to-V4 migration, deploying approximately 150+ MuleSoft apps via Azure DevOps CI/CD.
- Planned and executed MuleSoft ESB runtime upgrade (4.2 to 4.4) across all environments with zero downtime.
- Defined and standardized DevOps practices for MuleSoft, .NET, and Java teams including pipeline templates, webhook configuration, and versioning & branching workflows.
- Resolved critical production incidents maintaining system availability for rail operations under SLAs.

Cognier Inc (Contractor to KCS through Randstad)

June 2017 - Jan 2020

Build and Release Engineer

- Built fully automated CI/CD pipelines for MuleSoft and .NET web services applications using TFS 2017 and PowerShell, replacing manual deployment processes.
- Administered enterprise TFS/Azure DevOps environment including groups, permissions, patch releases, and build/release failure resolution.
- Executed TFS migration and upgrade from TFS 2012 to TFS 2017 in a multi-server configuration including SQL Server Reporting Services.
- Managed MuleSoft server administration and migration from on-premises Management Console to Anypoint Hybrid Runtime Manager.
- Upgraded MuleSoft environment from runtime 3.8 to 3.9 and managed CAB approvals for production deployments.
- Created an Internal Maven Repository Manager for an organization and connected private repositories to organize dependency management using the JFrog Artifactory.

Tech Mahindra, India

Sept 2014 - Nov 2015

Associate Software Engineer

- Designed and implemented the transformation of manual ad hoc builds and deployments to a fully automated Agile CICD process.
- Implemented configuration management and release management processes, policies and procedures. Developed bash and shell script automation for Java application deployments and standardized GIT branching workflow.

Cadsys India Ltd,

Oct 2012 - Aug 2014

Graduate Engineer Trainee

- Supported telecom network facility conversions and engineering work order processing for Verizon database operations.
- Worked with Process Quality group and Quality Assurance group to achieve the Quality 100% QIL on Verizon SQL database to reduce the end-user efforts and time for reliable communication.

Education

Master of Science in Computer Information Systems - Rivier University, Nashua, NH
